I have a friend who came from this town. He was in UK for almost 3 years as a nurse. I was convinced when she said the town is nice and already high tech. This site proves indeed that town is nice to visit.

satisfaction is come from within the individual and it is not the responsibility of the government to please the individual as long as the government perform his duties to the citizen, which is to serve and protect Art. II sec. 4 of the 1987 Constitution. Serving the people by the government doesn't meant that the government will give everything that he has. Let me remind you as a citizen or electorate of this state you must comply and perform your obligation to the state not only insisting your rights but rather you should know and do your responsibilities.....B)
